

21st September 2020

Dear Parents / Carers,

The Science Department is pleased to announce the implementation of **Tassomai**- a homework platform that enables personalised learning of students.

This online platform, which is also accessible through an app, uses quiz questions that teach as well as test. The data obtained from answers, builds up a knowledge profile of that child's understanding and therefore allows a continual adaption of the content being quizzed. This process builds up student's knowledge, understanding and confidence, making them a master of the subject and helping them to achieve their best possible results.

Students are expected to complete a test, achieving a 'daily goal', at least five times a week (although every day would be better!). The tests are focused on a 'little and often' approach and should take no more than ten to twenty minutes to complete.

To register, each student needs to exactly type in the following web address **app.tassomai.com/signup**

Then click on **sign in with school code**

Enter the unique code: **XB5FMXJI**

Follow the instructions, choosing their science class, which they can check with their class teacher, and then quizzing can begin.

Extra guidance and tutorials can be located at:

Yours faithfully,

Miss S O'Shaughnessy

DDol Science
